Bank Asset-Liability Management

A 3-day guide through the key areas of bank ALM

Basel III implementation is upon us and banks now need to work towards balance sheet optimization in order to satisfy the sometimes competing demands of the regulator, the customer and the shareholder, and to preserve shareholder value efficiency. Efficient and effective asset-liability management (ALM) practice is the primary part of this process.

This 3-day **Bank Asset-Liability Management** program guides participants through the key areas of bank ALM: integrated ALM origination framework, capital management, liquidity risk, Funds Transfer Pricing (FTP) and interest rate risk in the banking book (IRRBB). It addresses both the challenge of implementing an efficient regulatory submissions process (ICAAP and ILAAP), to ensure that a bank is able to implement best-practice processes, and the "3-dimensional" optimization problem of meeting the requirements of all stakeholders.

How you will benefit

By attending the program, you will

- Implement best-practice ALM processes
- Ensure effective and best-practice ICAAP and ILAAP processes
- Apply strategic ALM discipline to ensure an optimized balance sheet in Basel III implementation
- Implement an integrated liabilities strategy that will optimize the liability structure while enabling efficient compliance with NSFR and LCR
- · Manage the balance sheet efficiently to account for new capital regulations such as Leverage Ratio
- Ensure IRRBB is managed efficiently to maximize hedge effectiveness and to minimize the regulatory capital charge
- Apply best-practice FTP processes into origination strategy to maintain effective balance sheet management
- Adopt an effective ALCO operating framework and governance mechanism that delivers an efficiently managed balance sheet

Who should attend

The Bank Asset-Liability Management program is relevant to executives who want to better grasp key areas of bank ALM. The program is especially beneficial to:
