Advanced Financial Statement Analysis

Discover how to read and understand financial statements

Are you interested in building deeper skills in analyzing accounting information? Do you want to make smarter financial decisions? Do you need to understand a company's profitability? Are you interested in a firm's growth in revenues and earnings, and how that growth drives share prices? Are you concerned with a firm's risk? Do you want to be able to evaluate a firm's financial statements? Do you want to learn how to evaluate "accounting quality" and adjust the statements if you suspect earnings management? Will it be helpful for you to forecast and model a firm's future earnings and cash flows, and use those expectations to estimate share value?

These are questions of great importance for many professions in the finance realm. Companies' reported financial statements provide a wealth of information to understand profitability, growth, risk, and value. But to unlock that wealth of information, you have to know where to look and how to analyze the numbers. The Advanced Financial Statement Analysis program will provide you with an analytical framework and practical tools to read and understand financial statements for intelligent financial decision making.

How you will benefit

By attending the program, you will

- Analyze and use the information that firms report in balance sheets, income statements, statements of cash flows, and related notes
- Understand the types of accounting choices and estimates under IFRS and US GAAP that managers make in terms of their business strategy, constraints, and especially incentives
- Evaluate firms' accounting quality, and test for the likelihood of fraud
- Know how to restate firms' reported financial statements to undo earnings management, when needed
- Develop a better understanding of the types of red-flags to watch out for by analyzing the current financial statements of a company. Learn this with real-life case studies of diverse high-profile organizations
- Gain a powerful toolkit you can use to analyze financial statement data to assess firms' profitability, risk, growth, and cash flows
- Develop a complete set of methods and mechanics for forecasting firms' future business activities. Learn how to measure the expected effects of those activities with projected future balance sheets, income statements, and cash flows
- Understand and apply various valuation approaches, including residual income valuation, discounted free cash flows, and market-based valuation multiples

Who should attend

The **Advanced Financial Statement Analysis** program is recommended for finance professionals who are keen to deepen their knowledge and skills in analyzing financial statement information. The program is especially relevant for finance professionals involved in equity investments, lending and credit risk assessments, mergers and acquisitions, corporate strategy and governance, consulting, and financial regulation.

Program at a glance

The **Advanced Financial Statement Analysis** program develops and applies a six-step framework for analysis and valuation of companies:

- Competitive dynamics within an industry
- A firm strategy and competitive advantages
- Accounting and financial reporting quality
- Financial analysis, focusing on profitability, risk, and growth
- Forecasting future earnings and cash flows
