Ali el Hassouni is Head of Data and AI at bunq, a Dutch fintech bank, with a background in academia. He finished his Ph.D. in Artificial Intelligence at the VU Amsterdam University on the topic of Reinforcement Learning. He leads the data team at bunq and has co-founded a startup in the fields of AI and Medicine.

Ali enables bunq to implement data-driven solutions and make sure the organization, as a tech company, stays on top of the latest trends in technology and improve the processes with AI and ML. Ali is now working to implement AI in a multitude of functions at bunq, such as user support, marketing, or app testing.
